

SUMMARY

Results-driven Full Stack Software Engineer with 2+ years of experience building scalable web applications using React.js, Node.js, Java (Spring Boot), and Python (FastAPI/Flask). Proficient in designing RESTful APIs, microservices, and CI/CD pipelines using Docker, Kubernetes, Jenkins, and GitHub Actions. Strong background in AWS cloud infrastructure (EC2, S3, Lambda) and relational/noSQL databases (MySQL, PostgreSQL, MongoDB). Adept at Agile/Scrum, system design, and TDD practices. Certified Salesforce Platform Developer with experience building CRM and enterprise systems. Currently pursuing MS in Software Engineering at Arizona State University. Actively seeking Software Engineer roles in MNCs where I can contribute to distributed systems, backend architecture, and full-stack innovation.

EDUCATION

Arizona State University | *Master of Science in Computer Software Engineering*

Tempe, AZ, USA
January 2024 – December 2025

Visvesvaraya Technological University | *Bachelor of Technology in Computer Science*

Bangalore, KA, IN
August 2018 – August 2021

TECHNICAL SKILLS

- Programming Languages:** JavaScript, TypeScript, Python, Java, C, C++, C#, Dart, PHP, Kotlin, Swift
- Frontend Development:** React.js, Next.js, Vue.js, Tailwind, HTML5, CSS3, React Native, Flutter
- Backend Development:** Node.js, Spring Boot, Flask, JavaServer Pages, FastAPI
- Databases:** MySQL, MongoDB, PostgreSQL, SQLite, Neo4j
- Cloud & DevOps:** AWS, Azure, Google Cloud Platform, Docker, Kubernetes, Git, CI/CD, Bash, Nginx
- Salesforce:** Apex, Lightning Web Components, Aura, SOQL, SOSL
- Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, System Design, REST APIs, Microservices, Agile/Scrum, Load Testing
- Game Development:** Unity

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER | CRM IT Solutions Ltd - Bangalore, India

August 2021 – June 2023

SALESFORCE IMPLEMENTATION FOR A HEALTHCARE ORGANIZATION

- Architected and designed a full-stack report generation system using React.js and Node.js, enabling clients to export comprehensive insurance claim histories with interactive charts
- Reduced report generation time by 26% and improved data visualization for 500+ daily users
- Engineered an intelligent Q&A system with dynamic query generation based on user responses, increasing sales team efficiency by 56%
- Implemented RESTful APIs and optimized database queries, improving system response time by 40%

PROGRESS MANAGEMENT SYSTEM IN SALESFORCE

- Led frontend development of enterprise PMS using React.js and Lightning Web Components and reduced performance review cycle time by 43% through automated workflow implementation
- Collaborated with cross-functional team of 8 members using Agile methodology and integrated Salesforce APIs and custom objects to streamline KPI tracking for 350+ employees
- Mentored 3 junior developers on React.js best practices and component architecture

SOFTWARE ENGINEER INTERN | HeadSpin, Inc - Bangalore, India

April 2021 – July 2021

- Crafted automated testing frameworks using Python and Selenium, reducing manual testing time by 35%
- Mastered multiple technology stacks (React, Node.js, Python) within 3 months, accelerating project delivery by 20%
- Presented technical POCs to stakeholders, improving client engagement by 40% and securing project approvals
- Collaborated with QA team of 5 members to implement CI/CD pipelines using Jenkins

CERTIFICATIONS

- Salesforce Certified Platform Developer I (Cred ID: 22800213)
- Salesforce Certified Administrator (SCA) (Cred ID: 22538834)

PROJECTS

CRM for Construction Company | *ReactJS (Redux, React Router Dom), NodeJS (express.js), PostgreSQL*

January 2023 – December 2023

- Designed and coded full-stack web application serving 500+ monthly active users and engineered responsive client booking system with real-time form validation and automated email notifications
- Programmed employee dashboard with role-based access control and permission management for 350+ users and integrated MySQL database optimization resulting in 68% faster data retrieval
- Eliminated 87% of manual data entry through automated customer registration workflow and deployed application on AWS EC2 with load balancing and auto-scaling capabilities
- Established approval workflow system ensuring zero communication gaps across 20+ staff members

FARMATO - IoT Agricultural Management System | *C++, JavaScript, PHP, MySQL, IoT, HTML, CSS*

January 2021 – July 2021

- Developed full-stack web application with JavaScript, HTML5, CSS3, and PHP backend, integrating MySQL database for automated plant irrigation management, reducing manual labor by 40 hours per week through intelligent automation
- Architected responsive user interface and RESTful API endpoints for plant watering schedule optimization, improving operational efficiency by 41% and reducing manual intervention by 25 hours monthly through data-driven decision making
- Implemented IoT sensor integration using microcontrollers and real-time data processing, deploying temperature, soil moisture, and water level sensors that achieved 32% water usage reduction and 26% improvement in system performance metrics
- Built real-time data analytics dashboard with JavaScript visualization libraries for sensor monitoring and optimized decision-making algorithms, ranking top 3 among 150+ competing projects and demonstrating proficiency in data structures, algorithms, and system design
