

SUMMARY

Results-driven Full Stack Software Engineer with 2+ years of experience building scalable web applications using React.js, Node.js, Java (Spring Boot), and Python (FastAPI/Flask). Proficient in designing RESTful APIs, microservices, and CI/CD pipelines using Docker, Kubernetes, Jenkins, and GitHub Actions. Strong background in AWS cloud infrastructure (EC2, S3, Lambda) and relational/noSQL databases (MySQL, PostgreSQL, MongoDB). Adept at Agile/Scrum, system design, and TDD practices. Certified Salesforce Platform Developer with experience building CRM and enterprise systems. Currently pursuing MS in Software Engineering at Arizona State University. Actively seeking Software Engineer roles in MNCs where I can contribute to distributed systems, backend architecture, and full-stack innovation.

WORK EXPERIENCE

IT Software Developer Intern | Maricopa Association of Governments (MAG)

October 2025 – Present

- Full-Stack Development:** Contributed to internal tool development using C#, JavaScript, and SQL Server, enhancing workflow efficiency for MAG staff.
- Backend Support:** Developed and maintained backend services using .NET MVC, optimized SQL queries with LINQ to enhance data performance, and leveraged Entity Framework for seamless data migrations.
- Frontend & UI:** Assisted in improving web interfaces using Bootstrap, Telerik & JavaScript, enhancing usability for internal applications.
- Version Control & Testing:** Utilized Git for code collaboration and participated in manual and unit testing to ensure code quality.
- Server Deployment:** Supported application deployment and management using Windows Server, IIS and Azure DevOps Pipeline.

Associate CX Cloud Developer | CRM IT Solutions Ltd

August 2021 – June 2023

- Frontend Development:** Led frontend development of an enterprise Performance Management System using React.js and Lightning Web Components, reducing performance review cycle time by 43% through automated workflow implementation.
- Backend Development:** Engineered an intelligent Q&A system with dynamic query generation based on user responses, boosting sales team efficiency by 56% through optimized backend logic and user-driven workflows.
- Database Optimization:** Implemented RESTful APIs and optimized complex database queries, leading to a 40% improvement in overall system response time and enhanced scalability.
- Data Visualization & Reporting:** Architected a full-stack report generation system using React.js and Node.js, enabling clients to export detailed insurance claim histories with interactive charts and reducing report generation time by 26% for 500+ daily users.
- Collaboration & Methodologies:** Collaborated with an 8-member cross-functional team using Agile methodology, integrating Salesforce APIs and custom objects to streamline KPI tracking for 350+ employees.
- Mentorship & Leadership:** Mentored 3 junior developers on React.js best practices and component architecture, promoting clean code standards and accelerating their onboarding and development efficiency.

Software Engineer Intern | HeadSpin, Inc

April 2021 – July 2021

- Test Automation:** Crafted automated testing frameworks using Python and Selenium, reducing manual testing time by 35%.
- Technology Adaptability:** Mastered multiple stacks including React, Node.js, and Python within 3 months, accelerating project delivery by 20%.
- Stakeholder Communication:** Presented technical proofs of concept (POCs) to stakeholders, increasing client engagement by 40% and securing approvals.
- DevOps Collaboration:** Worked with a QA team of 5 to implement CI/CD pipelines using Jenkins, streamlining integration and deployment processes.

EDUCATION

Arizona State University | *Master of Science in Computer Software Engineering*

Tempe, AZ, USA

January 2024 – December 2025

Visvesvaraya Technological University | *Bachelor of Technology in Computer Science*

Bangalore, KA, IN

August 2018 – August 2021

TECHNICAL SKILLS

- Programming Languages:** JavaScript, TypeScript, Python, Java, C, C++, C#, Dart, PHP, Kotlin, Swift, Apex (Salesforce)
- Frontend Development:** React.js, Next.js, Vue.js, Tailwind CSS, HTML5, CSS3, React Native, Flutter, Lightning Web Components, Aura (Salesforce)
- Backend Development:** Node.js, Spring Boot, Flask, JavaServer Pages, FastAPI, Salesforce Apex, Sequelize ORM, Hibernate ORM
- Databases:** MySQL, MongoDB, PostgreSQL, SQLite, Neo4j, SOQL, SOSL
- Cloud & DevOps:** AWS, Azure, Google Cloud Platform, Docker, Kubernetes, Linux, Git, CI/CD Pipelines, Bash, Nginx, Apache
- Software Engineering Concepts:** Data Structures & Algorithms, Object-Oriented Programming, System Design, REST APIs, Microservices, Agile/Scrum
- Testing Suite:** Selenium, Appium, Mocha, Jest, Test-Driven Development (TDD), Load Testing, Testing Apex
- Game & Mobile Development:** Unity, Flutter, Android (XML-based UI & Jetpack Compose)

CERTIFICATIONS & AWARDS

- Salesforce Certified Platform Developer I (Cred ID: 22800213)
- Salesforce Certified Administrator (SCA) (Cred ID: 22538834)
- Performer of the Month, CRMIT Solutions (Sep 2022) – Awarded for outstanding performance, consistent excellence, and key contributions to team and organizational success.
- Best Project Award, JSS Academy of Technical Education (Aug 2021) – Recognized for the top final year project out of 150 entries, based on innovation, technical quality, and impact

PROJECTS

CRM for Construction Company | ReactJS (Redux, React Router Dom), NodeJS (express.js), PostgreSQL

January 2023 – December 2023

- Designed and coded full-stack web application serving 500+ monthly active users and engineered responsive client booking system with real-time form validation and automated email notifications
- Programmed employee dashboard with role-based access control and permission management for 350+ users and integrated MySQL database optimization resulting in 68% faster data retrieval
- Eliminated 87% of manual data entry through automated customer registration workflow and deployed application on AWS EC2 with load balancing and auto-scaling capabilities
- Established approval workflow system ensuring zero communication gaps across 20+ staff members

FARMATO - IoT Agricultural Management System | C++, JavaScript, PHP, MySQL, IoT, HTML, CSS

January 2021 – July 2021

- Built real-time data analytics dashboard with JavaScript visualization libraries for sensor monitoring also developed full-stack web application with JavaScript, HTML5, CSS3, and PHP backend, integrating MySQL database for automated plant irrigation management, reducing manual labor by 40 hours per week through intelligent automation
- Architected responsive user interface and RESTful API endpoints for plant watering schedule optimization, improving operational efficiency by 41% and reducing manual intervention by 25 hours monthly through data-driven decision making
- Implemented IoT sensor integration using microcontrollers and real-time data processing, deploying temperature, soil moisture, and water level sensors that achieved 32% water usage reduction and 26% improvement in system performance metrics and optimized decision-making algorithms
